

We also produce: Brayseal | Brayslide | Braygrip | Wicketted & Collated | Conventional | Film on Reel & Lidding Film | Laminated Film & Braypouch Bags

Description

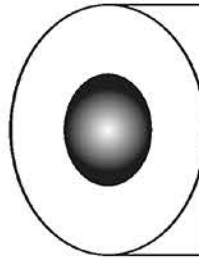

Brayford Plastics can offer packaging films for form fill and seal, and flow wrapping application.

Various specialist materials are available to suit your needs, which have been designed to aid packing speeds and include Metallocene Coextuded LDPE, Oriented Polypropylene and combinations of Laminated substrates.

All films are slit on high speed machines giving precision record edges and are supplied individually wrapped in reel weights tailored to your production needs.

Please note:

Above is a guide only and dependant on how many across the job is to be printed, if you require a specification outside the above please contact our sales department on: 01522 559429

Manufacturing Specification

Repeat Min 105mm
Repeat Max 720mm
